

Hygiene to suit your requirements

Comprehensive service solutions with CWS ParadiseLine

CWS

HYGIENE

We shake a lot of hands every day, and precisely this contact is a perfect opportunity for germs to spread, resulting in illness and absence from work and training. For example, an employee's hands come into contact with millions of germs on a daily basis, but there's a simple way to prevent infections: proper handwashing.

We offer you the perfect solution for improved hygiene: resource-saving and sustainable, not just in your washrooms. For a healthier and safer tomorrow – that's our vision. Our rental service offers you the very best options, allowing you to focus all your attention on your core business.

30%

Around just 30% of all visitors to the toilet use soap when washing their hands!

Fewer sick days

Most infectious diseases are spread via our hands: careful handwashing with soap and water cuts illness rates and saves costs associated with employee absences!

Increased hygiene and well-being

1 Soap is a must:

- Water on its own is not enough: soap is essential for rinsing away germs and dirt
- Foam soap can be lathered and rinsed off easily, helping you to save water

2 Proper drying

- Textile and paper towels remove any germs still on the hands after washing
- Important: Only use single-use towels – either in the form of a sustainable cotton towel roll or a paper towel/roll dispenser

3 Optional: disinfection

Disinfectant can be a sensible addition to handwashing. Especially

- at times when diseases are prevalent or
- in case of frequent contact with people who are sick or have a weakened immune system

4 Contact-free operation

- Sensor-controlled dispensers offer an additional hygienic advantage
- They are easier for children, the elderly and persons with mobility restrictions to use

5 Hygienic WC

- Clean toilet seats are an essential factor in hygiene and well-being
- You can offer your users improved safety and security with automatic and manual disinfection and cleaning systems

6 Simply feel good

- A pleasant fragrance increases the perception of hygiene – as confirmed by 84% of the respondents in an international hygiene survey¹
- In addition, a nice scent also has a positive effect on productivity¹

Evaluation of cleanliness of public toilets in different areas¹

¹ CWS, international survey: How clean are public toilets?

Sustainable furnishings

Sustainable = efficient

Saving resources also means saving money. Did you know that foam soap goes a lot further than cream soap? Or that foam soap can lower your water costs as it is foamed upon leaving the dispenser? Plus, did you know that cotton towel rolls do not produce any waste at all in the wash-room and thus save you the costs for disposal? Our resource-saving products are kind to both the environment and your bank balance.

Your “green” washroom

Is protecting resources important to you? Reducing water consumption and waste too? We will be happy to advise you on sustainable hygiene solutions that support your positive environmental record. And we help to make your commitment to the environment visible to your wash-room users with our ecoilet label for sustainably furnished washrooms. The eco-label is awarded for the use of CWS cotton towel dispensers, CWS foam soap dispensers and recycled toilet paper. All the above products help to save water, resources and consumables.

Turn your washroom into your “green business card” for customers, staff and guests with the ecoilet label.

Circular economy

Even before the term circular economy was on everyone's lips, CWS was already offering its customers precisely that: sustainable, reusable solutions in an all-inclusive, care-free package.

Our service cycle is tailored towards saving resources: We collect towel rolls and hygiene boxes from you for reprocessing in our laundry, where they are cleaned and repaired too if necessary instead of being disposed of! Afterwards, we deliver the reprocessed products back to you again.

ecoilet – your green business card

Visible sustainability for your washroom: Our eco-label is awarded for the use of CWS cotton towel dispensers, CWS foam soap dispensers and recycled toilet paper. Together, these products help to save water, resources and consumable materials.

CWS cotton towel dispensers

- Awarded the Blue Angel eco-label (RAL-UZ 77) and the Hygienezertifikat (hygiene certificate)¹
- Cotton towel rolls use up to 48 % less energy and produce up to 95 % less waste and 29 % fewer greenhouse gases²
- Each user gets his own portion of fresh cotton towel
- Optimal hygiene thanks to separation of fresh and used towel

CWS foam soap dispensers

- The prefoamed soap concentrate cuts water consumption by around 30 %³
- The sparing use means soap consumption can be reduced by around 50 %³

CWS toilet paper dispenser with recycled paper

- Compared to virgin paper, the production of recycled paper uses less energy²
- Our recycled paper bears the EU Ecolabel for low environmental impact
- A roll brake in the dispenser ensures sparing use

For your satisfaction: our rental service

We like to wrack our brains thinking of the best hygiene solution for your rooms – leaving you to focus on your core business.

- We have the perfect advice: we determine precisely what materials you need. No more, no less!
- We perform regular deliveries of consumables: that saves you time and there is no need to reorder. In addition, you also save space, as you only need to store what you currently require at any given time.
- We offer flexibility: your service cycles can be adjusted if and as required (different delivery cycle, modified refill quantities).
- We take care of your dispensers (maintenance and, if necessary, repair or replacement).
- We are there for you: on the phone, via e-mail and during our regular service visits – your customer consultant will also be happy to pay you a visit!

The CWS cycle is at the heart of our business

¹ Blue Angel:

Applies for the subsidiaries CWS-boco Deutschland GmbH, CWS-boco BeLux N.V., CWS Nederland B.V., CWS-boco Suisse SA, CWS-boco Ireland Ltd.

Hygienezertifikat (hygiene certificate):

Applies to the subsidiaries CWS-boco Deutschland GmbH, CWS-boco BeLux N.V., CWS Nederland B.V., CWS-boco Suisse SA.

Paradise DUO

- Mechanical dispenser with reserve roll function
- Automatic activation of reserve roll when first roll is used up
- Replacement of cotton towel roll while second dispenser is still available for use
- Up to approx. 220 towel portions

Our cotton towel systems bear the Blue Angel environmental label as they avoid waste and reduce water contamination. The Hygienezertifikat (hygiene certificate) honours the entire service cycle of our rolls from their use in the dispenser to their collection, washing and delivery.

Paradise Paperroll

- Contact-free mechanical system (only the paper is touched)
- Automatic cutting mechanism for 25 cm portions
- Wheel (emergency wheel) for paper output
- Rapid replacement of paper roll (easy loading system)
- No power or battery supply necessary
- Capacity of approx. 400 portions

Paradise Paper Universal

- For approx. 600 paper towels

Everything you need for toilet hygiene

Toilet paper dispenser

Paradise Toiletpaper

- Two toilet paper rolls in one dispenser
- Continuous availability thanks to reserve roll
- Reserve roll not released until the first roll has been used up
- Integrated roll brake prevents endless unrolling

Paradise Superroll

- Perfect for use in heavily frequented washrooms
- Cost-efficient, complete use of large rolls thanks to integrated reserve roll holder
- Noticeably lower maintenance requirements
- Simple and clean tearing of paper thanks to blunt teeth
- Integrated roll brake prevents endless unrolling

WC seat cleaning

Paradise Seatcleaner

- For manual cleaning of the toilet seat
- Rapid-acting surface disinfectant in acc. with EN 13697
- Bactericide, yeasticide, partial virucide
- VAH-certified
- Supports concepts and guidelines such as HACCP and LMHV
- Residue-free. Free from perfumes and aldehydes
- Simple use and drip-free spray dispensing
- Approx. 1,500 spray portions per 300 ml pouch
- Simple replacement of the plastic pouch with cleaning fluid thanks to patented click-in bottle system
- Space-saving disposal of empty pouch

Paradise Cleanseat

- Automatic cleaning of the toilet seat after every use
- Alcohol-free surface disinfectant
- Bactericide, yeasticide
- Prevents development of limescale, urine scale and odours
- No waste such as paper or plastic (from covering seat or seat covers, etc.)
- No changes in user behaviour
- Option of triggering cleaning process manually prior to use
- Display provides information on system status
- "Power" version to meet the toughest demands and high visitor traffic, with 230 V/50 Hz mains connection and water connection
- "Universal" version for use in all areas with normal visitor traffic, battery operated

Fragrance

Fragrance system

Paradise Air Bar

- Intelligent diffusion concept for even distribution of fragrance (no spray)
- 2-chamber system for long-lasting freshness and the use of different fragrances (avoids accustoming to one specific fragrance)
- Neutralisers in the fragrance also eliminate bad smells
- 9 specially created CWS fragrances for use inside and outside the washroom
- Sensor-controlled day/night switch
- Adjustable intensity
- Service light on the outside indicates need for maintenance
- Battery operated

Waste solutions

Waste bins

Paradise Paper Bin

- Available in two sizes: capacities of 23 l and 43 l
- Removable lid
- Concealed opening
- Floor-standing or wall-mounted

Hygiene box

Paradise Ladycare

- Waste bin for environmentally friendly and proper disposal of sanitary waste
- Reduction in drain blockages
- Hygienic gel ensures pleasant smell
- Special lid hides contents from view
- Available in sensor-controlled and manual versions
- Floor-standing or wall-mounted

Adapted to your requirements

- **Customised:** Select the colour of the panels or a customised motif to match your facilities
- **Secure:** The integrated lock prevents theft of the contents
- **Robust:** All dispensers are made from impact-proof plastic
